Aluminium Plates	-	-	-		-

Rates of Al as per MCX - Rs. 110.65 per kg. as on 04th Mar 2015

Highlights for the tender:

(1) Negotiation of tender was conducted in a conventional manner and no E-auction was held.
(2) In case of Alu Plates, introduction of M/s Malini Metals resulted in increased realization of Rs. 0.50/kg over the current rates
(3) In case of Press Sweeping, introduction of a new customer M/s UMM Paper Group resulted in maintaining the same rates as that of current period.
(4) Overall, there has been a reduction in realization value for newsprint related waste primarily due to reduction in newsprint rates.
(5) For item number 4, 12, 15 & 16 (Pune Scrap Related Items sheet), the rates received are very less and these items are generated very less in quantity and not regularly. These items require MPCB authorized customers and the regular customer has quoted very less for these items and also in the current period, there have been lot of issues in lifting. Hence, the proposal is to store the items and dispose it to other customers for which the discussions are in progress. This will help in breaking the monopoly of the existing customer and better rate realization. Hence, the quantity in the comparative sheet for these items is zeroised.

Request approval for all categories of waste as per rates received for the quarter Q2-15 & Q3-15.
